

A bespoke tool for creating
knitted cord.

Designed by a maker, for makers.

I don't know about you, but while I love the way i-cord looks, I really dislike knitting it. So, I decided to see if I could design a tool to make the process more enjoyable, and faster too.

Enter, the Cordsmith. This simple tool allows you to create a row of i-cord with a single movement, replacing three knit stitches and the time it takes to slide your stitches back to your working needle again. Yes, it really is that fast and it's easy enough that kids can use it too!

Point your smartphone's camera at the code to the left and tap the link that appears to find out more about Cordsmith and get access to tutorials!
